

ASCEND INSTITUTE, GANGTOK

CHAPTER-WISE TEST

ICSE CLASS 8 - BIOLOGY

Chapter: Human Body - I: Control and Coordination

Date: _____

Name: _____

Maximum Marks: 20

Time: 40 minutes

Instructions: Answer all questions. Section A contains 8 MCQs of 1 mark each. Section B contains 6 questions of 2 marks each. Show the necessary steps wherever required.

SECTION A - 8 MARKS

1. The neuron that carries impulses from a sense organ to the brain or spinal cord is a:

- | | |
|------------------------|--------------------|
| (i) Motor neuron | (j) Sensory neuron |
| (k) Association neuron | (l) Mixed nerve |

Answer: _____

2. The part of the brain that mainly maintains balance and coordinates muscular activity is the:

- | | |
|-----------------------|-----------------|
| (i) Cerebrum | (j) Cerebellum |
| (k) Medulla oblongata | (l) Spinal cord |

Answer: _____

3. The medulla oblongata mainly controls:

- | | |
|---|-----------------------|
| (i) Thinking only | (j) Voluntary writing |
| (k) Involuntary actions such as breathing | (l) Growth of bones |

Answer: _____

4. The pituitary is called the master gland because it:

- | | |
|------------------------------|-------------------------------------|
| (i) Produces digestive juice | (j) Controls other endocrine glands |
| (k) Carries nerve impulses | (l) Forms red blood cells |

Answer: _____

5. Which gland has both endocrine and exocrine functions?

- | | |
|--------------|---------------|
| (i) Thyroid | (j) Pituitary |
| (k) Pancreas | (l) Adrenal |

Answer: _____

6. The hormone that prepares the body for an emergency is:

- | | |
|---------------|----------------|
| (i) Insulin | (j) Adrenaline |
| (k) Thyroxine | (l) Glucagon |

Answer: _____

7. Many quick reflex actions are controlled mainly by the:

- | | |
|----------------|-----------------|
| (i) Cerebrum | (j) Spinal cord |
| (k) Cerebellum | (l) Pituitary |

Answer: _____

8. Which is a common change during adolescence?

- | | |
|-----------------------------------|----------------------------|
| (i) Reproductive organs mature | (j) All growth stops |
| (k) Heartbeat permanently doubles | (l) Sense organs disappear |

Answer: _____

SECTION B - 12 MARKS

Answer all questions. Continue on the back side if additional space is required.

9. State two differences between nervous control and hormonal control. [2]

10. Write the correct sequence of a reflex pathway from receptor to effector. [2]

11. State one function each of the cerebrum, cerebellum and medulla oblongata. [2]

12. Write any two functions of the spinal cord. [2]

13. Name one hormone secreted by each of these glands and state one function: pituitary and pancreas. [2]

14. State any four physical changes commonly seen during adolescence. [2]
